

Digital Braille at your Fingertips

DIGITAL. MULTI-LINGUAL. AFFORDABLE.

World's Most Affordable Refreshable Braille Display

Introducing BrailleMe – digital, affordable, powerful and all that you ever wanted. Now surf the internet, read millions of books, connect to your mobile and computer all in Braille. Its portable design and long lasting battery is perfect anywhere, anytime. Powered by our patented Braille cell technology, it is very friendly on your pocket.

BrailleMe has a fast, smooth 20-cell 6-dot Braille display designed to give paper-like crispness. It has a Braille style keypad and cursor buttons for dynamic typing. It is ideal for students for easy access to books and note-taking as well as for working professionals with compatibility with computers and screen readers and enabling a seamless experience of Braille and audio.

United Nations
Educational, Scientific and
Cultural Organization

BrailleMe was shortlisted amongst top 10 projects by an international jury of UNESCO King Hamad Bin Isa Al Khalifa Prize for the Use of Information and Communication Technologies in Education

What our customers say ...

With Braille Me's technology there could be a major price shift in this field that benefits millions of people around the world. School systems could afford Innovision's Braille display and help children around the world

- **BRIAN MACDONALD** , President, National Braille Press

Whilst Refreshable braille is an excellent technology, it has been frightfully expensive through the imported products. This is where BrailleMe as a disruptive innovation provides the distinctive advantage.

- **SAM TARAPOREVALA**, Chairman, XRCVC
